

Raxton - investing in your business

The most comprehensive service in the industry

Are you accessing all that Raxton can do for **You?**

We're enabling you to manage your inventory - keeping product levels to a minimum.

At Raxton we've invested heavily in building our core capabilities, that will, along with our fast-track order processing, enable us to fulfil orders, quickly, efficiently and at a competitive price.

We've put together a dynamic engineering team dedicated to helping you with innovative breakthrough products. And as always, we meet the most up-to-date hazardous area standards.

Raxton's Commitment

- To have over 2000 product lines in stock
- A machine shop with CNC capability for specials and rapid response
- A fast track process for orders
- Certifications and approvals that meet the most up-to-date hazardous area standards
- To have an engineering team developing new products.
