

Data sheet Raxton Accessories

Earth Tags

Raxton Earth Tags provide a means of connecting a flexible earth bond with the gland, thread Adaptor or thread Reducer in any required position whilst ensuring suitable earth continuity. Available in Brass, Aluminium and Stainless Steel and supplied self colour as standard additional plating is available if required.

Washers

To maintain the IP rating of the equipment Raxton offer a wide variety of entry thread sealing Washers and 'O' rings. Materials include Nylon, Teflon, Neoprene, Fibre, and Rubber. In addition Raxton can offer a non setting universal jointing sealant.

Lock nuts/Lock rings

Raxton offer a large variety of Locknuts/Lockrings which are often recommended for securing cable glands, thread Adaptors or thread Reducers to a gland plate or into equipment. Locknuts are available in Brass, Mild Steel, Stainless Steel, Aluminium or Nylon.

Screwed Nippling

Supplied 50mm long as standard, alternative lengths can be supplied as required. Available in a variety of thread forms. Materials include Brass, Mild Steel, Stainless Steel, Aluminium. Metallic finishes can be plated to requirements.

Couplers

Manufactured in Brass and Stainless Steel as standard. They are supplied in all standard thread forms and sizes.

Bushes

Male and Female Bushes are available in a variety of thread forms. Materials include Brass, Mild Steel, Stainless Steel, Aluminium and may be plated to requirements.

Shrouds

Raxton offer a range of push on Shrouds which are used to minimise the risk of dirt or foreign substances gathering on the cable gland body and /or point of cable to the gland interface. Supplied as standard in black PVC they are suitable for all leading makes of glands.

Serrated (Shakeproof) Washers

Raxton Serrated Washers are available in both Mild Steel Zinc plated and Stainless Steel and prevent the risk of attachments becoming loose when used in conjunction with a Locknut.
