

Data sheet Breather-Drain Plugs

The Raxton Exd Breather/Drain Plug is designed to:

- 1) effectively drain moisture from an enclosure
- 2) allow air from the enclosure to vent into the surrounding atmosphere thereby minimising moisture build up and
- 3) provide the explosionproof safety required by a hazardous area environment.

Raxton EExe Drain Plugs effectively drain any moisture build-up present within the enclosure whilst allowing air in the enclosure to breathe with the surrounding atmosphere minimising moisture build up within the enclosure.
